

Stens' True Blue® belts give you the edge to offer your customers the best.

Double wrap belt with tough KEVLAR® CORD.

Stens Tru-Blue belts are manufactured by Thermoid HBD Industries, Inc. of genuine DuPont Kevlar® for V-belts. Kevlar is 5 times stronger than steel on an equal weight basis, yet, at the same time, is lightweight and flexible. KEVLAR is one of the most important man made organic fibers ever developed.

General features of KEVLAR:

- High tensile strength at low weight
- Low elongation to break high modulus (structural rigidity)
- Low electrical conductivity
- High chemical resistance
- Low thermal shrinkage
- High toughness
- Excellent dimensional stability
- High cut resistance
- Flame resistant, self-extinguishing
